

## R4X - Installation Instructions -

1

Determine box location and position in accordance to floor plan.

2

Attach the cover to the box using the four supplied screws. Attach conduits to the selected knock outs..

3

Drop the box on the floor cut out. Locate the clips tighten screws and fasten them until the box is properly secured to the floor (See Fig A and B below)

**Warning:**

To be installed and/or used in accordance with appropriate electrical codes and regulations.

**Warning:**

To avoid fire, electrical shock and/or electrocution turn power OFF at the circuit breaker before wiring.

4

Remove the mounting panel to gain access to the wiring compartment. Remove barriers to communicate the compartments - if necessary-

5

Barriers must be installed when placing line and low voltage devices on the same side of the box. Wire devices in accordance with the NEC.

6

Attach faceplates to mounting panels.

**Caution:**

Wire devices in accordance with the NEC. If you are not sure about existing conductor wires, color coding, polarity and circuit feed contact a licensed electrician.

7

Install the floor covering material (Carpet, Wood, etc) on the recessed space -if applicable. Recessed area: 7/16" (12mm)

8

Installation Complete.
