

R01 Raised Floor Box

The R01 floor box is a single gang box suitable for installation in raised floors applications that provides access to power or low voltage connectors where are needed. Floor box intended for interior dry locations only where there is no scrub water accumulation.

The one gang floor box is ideal for power or low voltage connectors. FBS faceplates include standard duplex receptacle and decorator style which accept a wide variety of devices for power and up to six keystone jacks such as HDMI, RJ45, RJ11, USB, into the box.

Faceplates, devices and low voltage inserts sold separately.

NOTE: Power and low voltage cannot be combined in this box.

Features

- 16 GA galvanized steel housing
- Low profile box - Easy installation in low profile floors (3 3/8" depth)
- 6 - Knockouts (2 for 1" + 4 for 3/4" conduits)
- The painted interior offers a professional and aesthetic look.
- Powder coating adds extra protection layer against corrosion.
- Made in U.S.A..
- One gang for power or low voltage applications.
- Manufactured in compliance with UL514A Standard.

Note: The kit includes the floor box and cover.

	Length	Width	Height
Floor Box	5 3/8" (136.5 mm)	5 3/8" (136.5 mm)	3 3/8" (86 mm)
